**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, 56-76, 79-81, and 91-96, drawn to key generation, classified in class 380, subclass 44.
- II. Claims 29-55, drawn to block/data stream enciphering, classified in class 380, subclass 37.
- III. Claims 77-78, 82-90, drawn to copy protection of video signals, classified in class 380, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-II has separate utility such as Group I is directed towards key generation for encoding digital contents, Group II is directed towards block/data stream enciphering using block reordering structure, and finally Group III is directed towards copy protection of video signals. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
